Hallo Everyone.

Not a surprise but at least we have an answer. I will compare responses to questions I asked as on a brief read through it looks like he has glossed over things.

It is not true in any shape or form to say that a S. 106 agreement monies are purely for open space. There can be a clause to say that X amount of pounds is to provide the indoor bowls facility.

I will look at the documents etc relating to the Civic Quarter Masterplan over the weekend and draft a response to Ashley Sharpe. He has been with RBC for ages.

I think for the time being we should go slowly and quietly but once we are back to indoor bowls we ramp up the action and get all and sundry involved, e.g councillors, newspapers, tv and radio stations, bowls England etc.

There is no point getting people involved during outdoor bowls season that would show lack of use. Need to think of some way to increase usage during summer to support the need to have an indoor bowls facility. I know Colin has said has been done before ? Failed. Need a bit of brainstorming to find a solution.

Hope this is helpful.

Have a good weekend

Katherine
